

STREAMING – DOWNLOAD - PROMOTION

INTRODUCTION

Start
2020

Music Worx is a new platform for music professionals and music fans. We especially aim at DJ streaming. We have developed our own software STREAMBOX that enables us to offer mainly offline streaming. All streams are charged to the labels. This software will be linked to DJ mix software like Traktor or Serato and for start to our own called MIXWORX. The STREAMBOX is worldwide unique and enables a professional work for DJ professionals as well as beginners.

Additionally we offer music download and special promotion of the artists and their releases. We are already promoting electronic music to over 420'000 professionals.

We also offer a music fans website with mobile apps. A lot of things are linked to the PRO website. The music fans can profit from the professionals. Fans can mainly stream but also buy the tracks and albums. Fans can follow the professionals, stream and share their tracks and create their own playlists. This website is very similar to Spotify, Deezer, Tidal, Apple Music and others.

2022

Unique feature

We are the only streaming service that offers two different platforms, based on the different needs. Nevertheless, music professionals (DJ's, artists, labels) interact with music consumers. It's a win-win situation for both.

We offer the PRO's the software Streambox and Mixworx, as well as a mobile app (IOS&Android) for free in subscription.

We have the world's most sophisticated and unique software for offline streaming: Streambox. The streambox is included in the subscription for free.

We offer not only streaming but also music download, for PRO's and consumers.

DJs don't have to buy additional DJ mix software, they get Mixworx as a subscription.

Artists and label owners can promote their releases separately through our community.

We are specialized in electronic music, dance, hip hop, chill&lounge, funk&R&B, Latin and jazz.

Available Technologies

2 Websites, Mobile Apps, Streambox, Mixworx

Music fans website
